DIRECTIONS

HOOKS

Gallery Allen Key Hook

These Hooks are for use with both Gallery Clear Tape and the Gallery Stainless Steel Cable Hangers.

DIRECTIONS: Slack off the screw using the key provided and feed the end of the clear tape (or stainless cable) through the hook body. Slide to the required position and tighten.

RECOMMENDED WEIGHT: On the Gallery Clear Tape Hangers 15kg per hook. On the Gallery Stainless Steel Cable Hangers 20kg per hook.

ADHESIVE FOAM PADS: 20 of these are supplied in each pack of hooks. Stick one of these pads near the lower corners at the back of each frame. They help stabilize the frames and keep them straight.
